

PowerPoint to Windows Movie Maker: Step-by-Step

You can create slides in PowerPoint to include in your MovieMaker project. After you create the PowerPoint slides you wish to include, follow these steps.

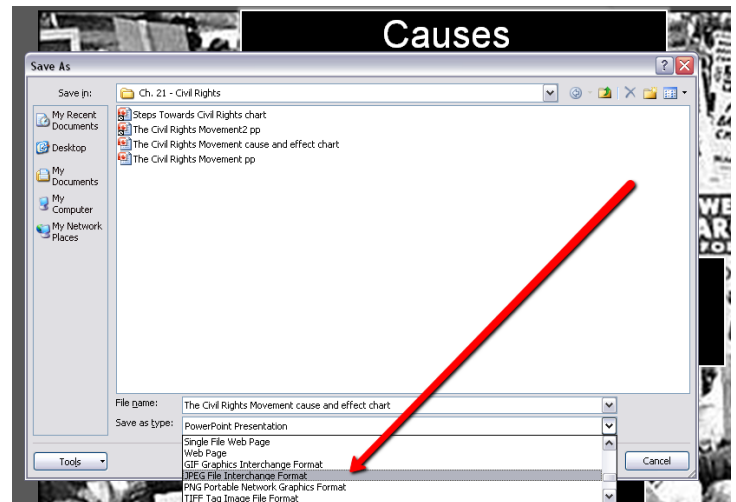

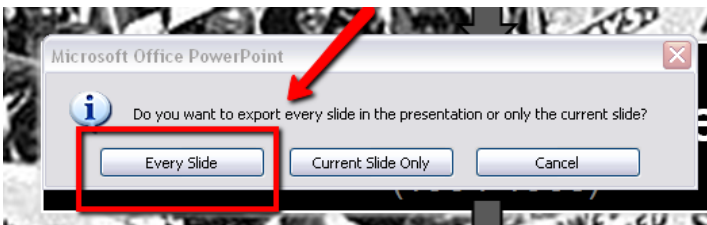

1. Choose "Save As" → PowerPoint Presentation

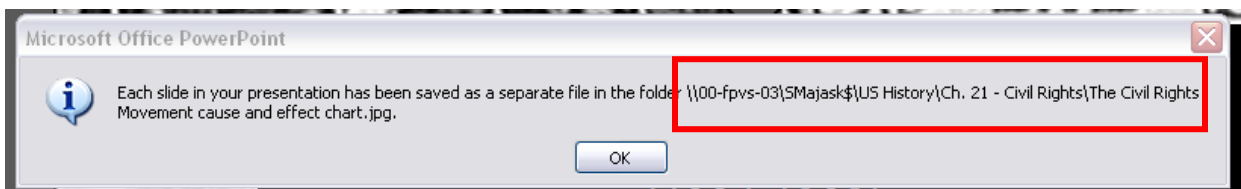

2. When the "Save As" box appears - select "Save as type". Scroll down and find "JPEG File Interchange Format"

3. Select "Save"

4. PowerPoint will then ask you – "Do you want to export every slide in the presentation or only the current slide?" Choose every slide.

5. After it saves it lists the location of where your slides were saved. Make a note of the location. It will be in a folder.

6. Now you can import pictures as an image. See "importing images" in your MovieMaker directions.
